Microphone on PSTN has been improved

Handset echo removed

Release notes for Cordless DUALphone Suite v.1.64

3rd of February 2005

If an outgoing call was initiated from the Skype window, the audio device sometimes wasn't updated correctly.

Changing of default audio device could fail on fresh Windows installations.

Added feature for checking the audio path to a handset. Press [#] and [PC hook].

Added new country: South Africa

When a contact changes to online status, the handset backlight is now turned on.

When pressing the on-hook key in standby mode, the handset now just turns on the backlight, and doesn't clear

any contact notifications in the display.
